### **REPORT**

Data and trends from over 600 staffing leaders paired with strategies + best practices for recruiting success

US and UK Edition 2021

### How the

## **Staffing Industry**

is tackling 2021

As the economy recovers from the ravages of the pandemic and businesses aggressively resume hiring,

- How has the staffing industry responded?
- Have priorities changed?
- What challenges endure?

We surveyed

600+ staffing leaders

2222

from over a dozen industries to get insights and perspectives straight from the source.

2

# The **insights** are fascinating.

In an increasingly complex hiring landscape, driving recruiter efficiency and maximizing placement rates remain key goals. But with demand for talent outstripping supply by a factor of two in key markets, staffing organizations are seeking new and urgent ways to build deeper and lasting relationships with their candidates. Firms are also looking to maximize the ROI on their tech-stack, with an overwhelming majority increasing their spend on automation and AI to achieve those goals.

"We hope this report gives you a strategic view of the areas that industry leaders are focusing on to tackle continuing challenges and to bounce back from the effects of the pandemic."

Anil Dharni CEO and Co-founder, Sense

#3

# The big goals

Time-to-fill and cost-per-hire are the most important performance metrics of 2021.

In the staffing industry, high fill rate and low cost of hiring have always been the goals to chase. This year is no different.

of respondents said that time-to-fill is the most important performance metric to watch in the next 12 months. This is followed by cost-per-hire and redeployment rate, both metrics that indicate the health of the staffing business.

Other key metrics that staffing leaders are prioritizing are directly influenced by candidate experience: Drop-off rate from offer to start and turnover rate from job start to finish.

#3 The big goals

#### What performance metrics do you need to improve in the next 12 months?

Time-to-Fill	66%
Cost-per-Hire	37.5%
Redeployment	34.1%
Drop-off Rate (From offer to assignment start)	31.8%
Turnover Rate (From assignment start to finish)	30.7%

# The big goals

Staffing firms want recruiters to focus on **relationship building** and **active listening**.

How do top recruiters achieve their success? Our survey provides some insights into what leaders believe their top recruiters - in this case those who have reached 125% of their quota - do differently than their counterparts:

A whopping 82% of respondents said that relationship building is a key trait among their most successful recruiters. 64% said active listening is foundational to building candidate trust.

When recruiters demonstrate these traits, they are more likely to enhance their candidates' experience and win their trust, ultimately resulting in higher placements and a <u>stronger</u> employer brand for staffing firms.

Staffing leaders also believe that their topperforming recruiters are more willing to take the faith and embrace new technologies with nearly

### 48%

of the respondents saying technological proficiency is a key trait among their top recruiters. This is crucial as more millennials now begin to enter the job market, these individuals have a new way of communicating. Recruiters need to adapt to these new ways or risk being left behind.

**#3** The big goals

Medix

# Key challenges

Increasing recruiter efficiency is staffing's **#1 challenge**.

#4 Key challenges Sense

According to hr.com, 69% of HR professionals report having tackled high-volume recruiting scenarios in the past year.

The pandemic has spiked talent demand in a number of industries, including

Healthcare

Frontline

Shipping

Delivery

Transportation

Conversely, recruitment team sizes have remained more or less the same. With recruiting teams working remotely or in a hybrid setup for over a year, it has never been more important for staffing firms to identify ways to maximise resources to reduce recruiter stress and help them improve their productivity.

## What are the top challenges in your recruiting process?

**respondents** say that their recruiters take over 6 hours to respond to new leads.

#4 Key challenges

For recruiters, the ability to respond quickly to job inquiries is a superpower. Not only does it help them build a better relationship with candidates, but it also has a direct impact on their ability to close more openings.

Unfortunately, given the volumes that recruiters are handling, it is not always possible for them to get back to new leads in time. By the time they do, the job seeker may have already moved on.

But as many staffing leaders admitted, optimizing recruiter response time is foundational to building a candidate-centric hiring process.

### On average, how long does it take your team to respond to a new lead?

Recruiters spend up to **50**% of their time on manual/repetitive tasks.

We've seen that staffing firms want their recruiters to focus on people-centric activities. However, reality is different.

40% of respondents admit that their recruiters spend up to half their time on repetitive administrative tasks while 19% believe that this number could be even higher.

The problem is that a number of tasks essential to recruiting, from screening candidate profiles to scheduling conversations and updating information in the applicant database, continue to be performed manually.

The answer to this challenge, however, could lie in tech solutions powered by Al. For instance, Al can be used to <u>create custom</u> workflows and automate up to

90%

of application and pre-screening, leaving recruiters free to spend their time building much-needed rapport with new candidates.

#### What percent of your recruiter's time is spent on manual/repetitive/administrative tasks?

Less than 10% of work hours	17.2%
11-25%	21.69
	21.07
26-50%	39.2'

"With tools like AI Chatbot, you are able to remove all the repetitive activities your top recruiters have to do like screening and scheduling, and that immediately expands their capacity. We started our implementation with 7 large enterprise clients, and we doubled our placements by the end of 6 months as a result of that increased capacity."

Lauren Griffin
Senior Vice President
Volt Workforce Solutions

#### What Applicant Tracking System do you use?

staffing firms want more value out of their Applicant Tracking System (ATS).

#4 Key challenges

## With your ATS, how easily are you able to find the highest-quality matches for open positions in real-time?

Nearly Impossible	
	6%
Not Easy	24
	249
Neutral	409
	40
Quite Easy	21%
	21/
Very Easy	9%
	9%

Did you know that more than half of new candidates sourced could already be in your database? Yet, staffing firms continue to spend heavily on job boards and sourcing platforms.

Your ATS can be a rich source of "high-quality" matches provided it is regularly updated with the latest candidate information and you have the capability to run outreach campaigns to reengage passive talent. And when backed by predictive analytics, your ATS can alert you to candidates who are ready for new opportunities or are likely to churn.

With Al-powered solutions, you can not only engage hidden talent in your ATS, but also autoenrich profiles with the latest information, thereby turning your ATS into <u>your most powerful</u> <u>sourcing tool</u>. #4 Key challenges Sense

#4 Key challenges

Your recruiters have done all the hard work and shortlisted some great candidates. Offers are rolled out and then, suddenly, some candidates begin to drop out of the process. A few may offer an explanation, but most simply ghost your recruiters.

There are many reasons to explain this behavior. Perhaps, the hiring process took longer than expected. Or the candidate didn't hear back from the recruiter soon enough. Or the candidate's early interactions didn't leave them with a great experience.

Whatever the reason, timely, personalized communication can make a meaningful impact in increasing candidate engagement and response rates. In a world where most of us spend much of our free time on our phones, engaging with candidates via texting is a great way to keep them updated on the process and check in on how they're feeling. This helps recruiters identify red flags early and plan interventions.

The good news is that today's technology can help you <u>automate and scale your communication</u> across multiple channels without losing the human touch.

"Automation in sourcing and talent communication has been critical for us. In 2020 alone, we went from 15 automated workflows to 81, resulting in an unprecedented talent engagement rate of 94%. We estimate automation has saved us over 30,000 recruiter hours."

Emily Giltner
CSC, CSP
SVP, Enterprise Operations
Staffmark Group

# The way ahead

To address these challenges and meet their goals, staffing firms are investing in **automation capabilities** that work with their ATS to maximize recruiting ROI.

For staffing firms - automation is **table stakes** now.

Al and Automation can help at every stage of the hiring cycle: from candidate sourcing and pre-screening to interview scheduling and from post-offer engagement to onboarding.

According to this survey, over 40 percent of staffing firms have implemented automation capabilities to scale personalised communication to both candidates and clients, and over 30 percent have the capability to drive text and email outreach.

When it comes to planned investments, these two remain the biggest areas of interest, followed closely by <u>chatbots to automate prescreening</u> and interview scheduling, along with <u>auto-enrichment of ATS.</u>

#### While only

of respondents said they have automated prescreening and scheduling, nearly 40% say they are planning to invest in these this year. Given that respondents said their #1 challenge is improving recruiter efficiency and speed of hire, this jump in spend allocation is no surprise. **#5** The way ahead

## Which of the following automation capabilities has your organization implemented?

Ability to scale personalized communication to candidates and clients	43.5%
Automated text/email outreach	
	39%
Accurate reporting on candidate engagement	38.4%
Automated NPS Surveys across multiple populations	
	32.8%
Automatically refreshing the database	31%
Chatbot for pre-screening candidates automatically	15%
Automated referrals and payouts	7%
Other	
	3.1%

**#5** The way ahead

sense

Data becomes more crucial

to maximize ROI.

Our research shows that even the top staffing firms in the country redeploy only 2-5% of their candidates.

That's right - up to

98%

of the candidates do not come back to the firm for another giq!

Considering the time and effort spent on identifying top talent and building a relationship with them, this number represents an incredible opportunity to make an impact on your bottom line.

No surprise that redeployment is high on the priority list of 59% of respondents who are investing in automation to scale personalization across the talent journey.

With automation, staffing firms can also enrich candidate profiles with the most recent and accurate data and ensure recruiters are proactively engaging qualified candidates who are ready for their next opportunity. And with regular check-ins, recruiters have the ability to build deeper and lasting relationships with their candidates

This, in turn, makes ATS a far more effective and reliable lead source, helping firms optimize costs and reduce spend on expensive acquisition channels.

**#5** The way ahead

# In which of the following automation capabilities do you plan to invest this year?

Ability to scale personalized communication to candidates and clients	58%
Automated text/email outreach	48.2%
Chatbot for pre-screening candidates automatically	40.5%
Automatically refreshing the database	39%
Automated referrals and payouts	31%
Automated NPS Surveys across multiple populations	27.2%
Accurate reporting on candidate engagement	21%
Other	4%

#5 The way ahead sense

of candidates who had a bad experience during the hiring process will share that with friends and family. How much more valuable is positive word of mouth?

Research has consistently shown that candidates who feel they've been treated well stay longer and refer your firm more often. Referral candidates not only save your recruiters time and effort - because the person who referred them has already done some groundwork - but are more likely to start and finish their assignment.

Automation simplifies the running of contractor referral programs by allowing you to create segments, target referral requests and customize referral communication.

It is heartening to note that

31%

of respondents plan to invest in automation capabilities specifically to automate referrals and payouts for their firm.

"Automation ensures that everyone is getting the highest level of service. It's consistent, it's happening on a centralized basis, and it's saving time for our recruiters and our staffing offices."

# **Conclusion**

For staffing organizations, change is here to stay. While Covid-19 has introduced new trends, it has also accelerated the rise of other enduring trends.

To lead a staffing org through this change, staffing leaders must factor that:

- Automation is now table stakes
- Investing in data-enrichment is crucial for success
- Top-performing recruiters are more candidate-centric than their counterparts
- Technology provides the key pathway to scaling candidate and client engagement
- Long-term metrics such as time-to-fill and cost-per-hire will remain on the forefront

Incorporating these changes into your staffing organization will prepare you for the future that is approaching faster every day.
